Religion	Islam

---

## CAREER OBJECTIVE

To build up an efficient carrer in the computer science and engineering and thereby serve humanity.

---

## WORKING EXPERIENCE

2018	Completed a project on making a e-commerce site(an online handicraft's store). I used PHP in back-end(server) and HTML, CSS, JavaScript, AJAX in front-end. I also used MySql in this project to build a MariaDB database.
2017	Completed a project on making a suggestion provider text editor with IDE features. In this editor, user can edit and compile different programming languages's source code. The editor has a intelegence module that can help the user providing stack-overflow suggestion on his/her error of code.
2017	Completed a project on building a statistical predictive and recommendation model on universtity student's salary as tutor. I used R to complete this project.

---
